

### Wellcome Trust

The brief: to exhibit the Wellcome Trust imaging awards within an existing, and somewhat limited space measuring 9 x 3.6m.

Our solution envisaged the insertion of a prefabricated 'light box' measuring 8.4 x 3 x 3m into the room, whilst maintaining access to offices beyond.

The modularity of the concept with services between new and existing structures, allows complete flexibility of use, both for the proposed exhibition and in future use as a small digital cinema.

Right: perspective and axonometric drawings

**Wellcome Trust**

Exhibition concept: section  
(not to scale)
